*As stated above, we really just need a good lcd video projector connected to a powerful audio system of some sort. The lighting should be very low during the screening. For the first video, a live piano player will be accompanying Candace's video. I have left about 25 seconds of black near the beginning of this video to allow the piano player to get on stage and get seated without rushing...

LIGHTING REQUESTS (two colour wash, specials, # of cues):

LOW AMBIENT LIGHTING WHILE PROJECTING VIDEO PLEASE.

AUDIO REQUESTS:

WE WILL NEED AUDIO FOR ALL PIECES.
